GNSS-Based Drag Performance Analyzer

Mastering Performance with Pbox

Features

- Simultaneous reception of GPS and Galileo at 10Hz.
- 500mAh battery for up to 8 hours of continuous measurement.
- The weight is as light as approximately 40g.
- The fastest search speed of satellites is as fast as 18 seconds.
- Video drag is available for single performance measurement.
- Measure acceleration and braking time.
- Customize drag performance measurements.

Speed(km/h)	Distance(m)	Time(s)
0-10	0.22G 3.23	0.99
0-20	0.22G 9.70	+1.02 2.01
0-30	0.22G 17.82	+0.75 2.79
0-40	0.22G 27.09	+0.66 3.45
0-50	0.22G 39.65	+0.75 4.24
0-60	0.22G 51.06	+0.57 4.81
0-70	0.22G 78.56	+1.35 6.16
0-80	0.22G 107.77	+1.03 7.42
0-90	0.22G 128.11	+0.71 8.13
0-100	0.22G 180.95	+1.82 9.95
